How Laser Machine Works

SF1390I laser engraving and cutting machine is used specially for the nonmetal art crafts, gifts and the engraving of bamboo products. The mechanical structure is strong and stable, making the machine to run at high precision. The electrical ability is stable, the engraving speed is high, and the precision is high.

Applicable materials:

Non-metal materials such as acrylic, double color board, Plexiglas, Common glass, bamboo and wood, rubber, marble, granite and tiles, leather cloth etc.

Applicable industries:

SF1390I has been widely used for engraving and cutting on nonmetal material, including Acrylic, Organic Glass, Crafts, Furniture, Glasses, Wood, PVC, Lightings, Advertising and decorating, pater, packaging lithography, mark plate, atomic stamp & seals, bamboo products, trademarks, embroidery, apparel and other industries. Adoptable for clothing tailoring, embroidery cutting, leather punch Pierced menthol cutting carving processing.

Characteristics:

- 1) Advanced LCD Touch Screen+ USB port+ DSP Offline Control, which can not only work without computer, but also connect to U disk, USB communication.
- 2) LCD Control System own 128M Big Memory, which can store files in the machine for engraving and cutting, compatible with AutoCAD, CorelDraw, Photoshop and some other kinds of graph disposal software.
- 3) Imported high precision linear guide rail and professional optical system, dustproof and lubricate, which improve the engraving quality and prolong machine lifetime.
- 4) Special Front and back running-through design, the unique door for the limitless engraved materials through.
- 5) Professional Honeycomb or Strip work table, which meet the needs of diversified laser procession;
- 6) Water Cooling System with Alarm Protection, adopt CW-5000 Water Chiller with temperature display, which can avoid over burning, to protect the water circulation from electricity-off.
- 7) Equipped with luxury Consumables, Imported Focus Lens and reflect mirror, Chinese Best Quality Laser Tube, 12000 hours Laser Tube and RF metal tube for your choose, makes high efficiency and steady.
- 8) High speed stepper subdivision driver control, numeral timing, simulation quantum control laser power, little error, repetition high precision, engrave 0.5X0.5mm little English character perfect.
- 9) Red Light Pointer realizes the exact position without laser.
- 10) Matched Professional software is particularly designed and written for engraving and cutting, with high compatibility, support any computer operating system.

What we need to know from your side:

please advise us the following information, so that we can recommend you the most suitable model, right now, feel free to contact us!

1. What kind of machine do you need? Laser cutting or laser engraving or laser marking?
2. What materials do you need to process? The size and thickness?
3. What is your business scope? Are you an end user or distributor?

Technical Parameters

Working size	1300*900mm
Cutting depth	≤25mm（according to material）
Laser power	RECI W6 130W
Laser type	CO2 glass laser tube
Laser power supply	130W
Mirror and Lens	25mm Dia. Si mirror; 20mm Dia. Znse IIV-VI lens
Engraving speed	1-60000mm/min
Control system	RDC6445G RUIDA
Control Software	RDWORKS V8
Working Table	Up and down table
Laser head	with Pen style Auto focus and red dot positioning
Protector	XY dust cover protection
Safety system	Three light alarm system+case open working stop system
Air compressor power	Haili 130W
Motor&Driver	Servo Motor&Driver
Exhaust fan Power	550W
Transmission	Italy PEK linear rail+ONK belt
Cutting speed	1-10000mm/min
Resolution ratio	≤0.0125mm
Interface	USB2.0
Minimum shaping character	letter 0.5mm, Chinese 0.5mm
Cooling type	Circulation water cooling CW5000
Support format	JPG,JPEG, PLT, DST, PLT, BMP, DXF, AI
Voltage	110V/220V 50HZ 60HZ
Operating temperature	0-45C
Operating humidity:	5-95%
Warranty	Machine:1 year, Laser tube:12 months
N.W/G.W	450KGS/500KGS
Size	2.07*1.53*1.2m

Machine Details

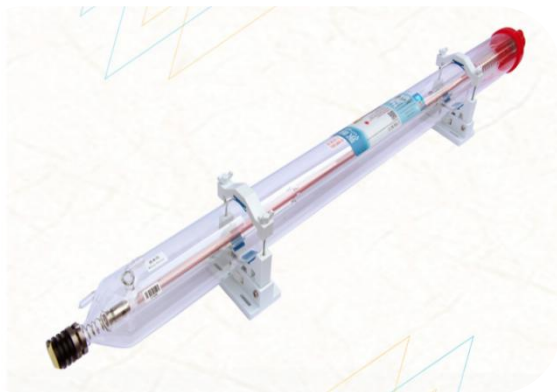

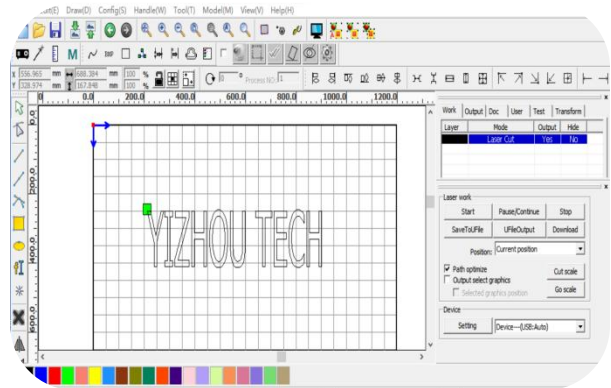

Easy operation LCD controller

Ruida RDC6445G/S system is a new generation system for 4-Axis control of laser engraving and cutting. Support Multi language.

With USB or WLAN Communication port

Simple Control Software

RDworksV8 software ,support multi-language support file format: JPG,JPEG,BMP, DXF, PLT,AI etc, Communication: 10/100M Ethernet + USB 2.0 Control.

Powerful and Long Life Laser Tube

Model:W6 YONGLI;Length:1650mm related power:130W
Peak power:160W working current:30mA Diameter:80mm
working life:12000hours Warranty:12 months

LCD Powerful Laser Power Supply

Model:130W/150W withLCD

Size:305*161*91mm

Weight:3.6KGS No downtime:>35000hours

25mm Dia. Si Mirror

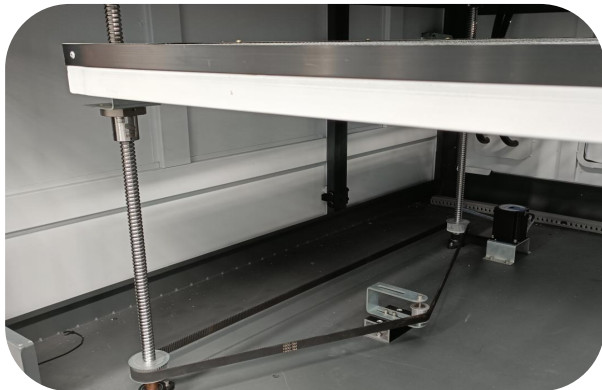

Silicon Mirror is a Silicon substrate, which has good optical and thermal properties. After coating a reflective film on Silicon surface, it can greatly improve its reflectance, which is approximately 99.8%, which can almost avoid the loss cause by reflection.

20mm Dia. Znse Lens

Diameter:20mm Focus length:50.8mm

Edge thickness:2.5mm

- 1.Double size AR coating high transmance 99.5%
- 2.USA CVD ZnSe Materials,up to 300W laser Resistance

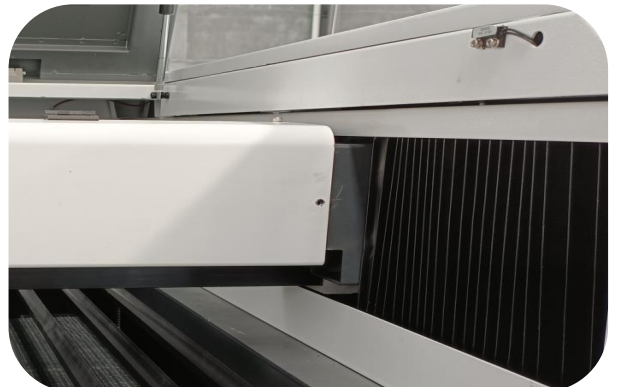

Double Table

Table: double table: honeycomb+sword blade
up-down motor: two phase stepper motor driving.
combined to auto focus function
transmission: high precision ball screw

XY Dust Protector

X axis: steel case protect linear rail and belt
Y axis: dust cover protect dust and water out of transmission

Powerful Chiller

Powerful cooling capacity, makes machine working normal in HOT countries and seasons.

Model: CW5000

voltage: 110V/220V 50HZ/60HZ

Weight: 24KGS

volume: 6L

Working Current: 1.4-2.1A

Size: 58*29*47cm

compressor power: 0.4HP/50HZ 0.52HP/60HZ

Cooling capacity: 2361btu/h 50hz 2999btu/h 60hz

Maximum flow: 10L/min

Red dot Positioning and Auto Focus

Red dot positioning: Make start point visible.

Auto focus: control the up and down table to ensure the Optimal focal length between the processed materials and the lens.

Warning Light

Green light indicates running fine

Yellow light indicates standby states

Red light indicates a problem with the running machine

Foot and Wheel

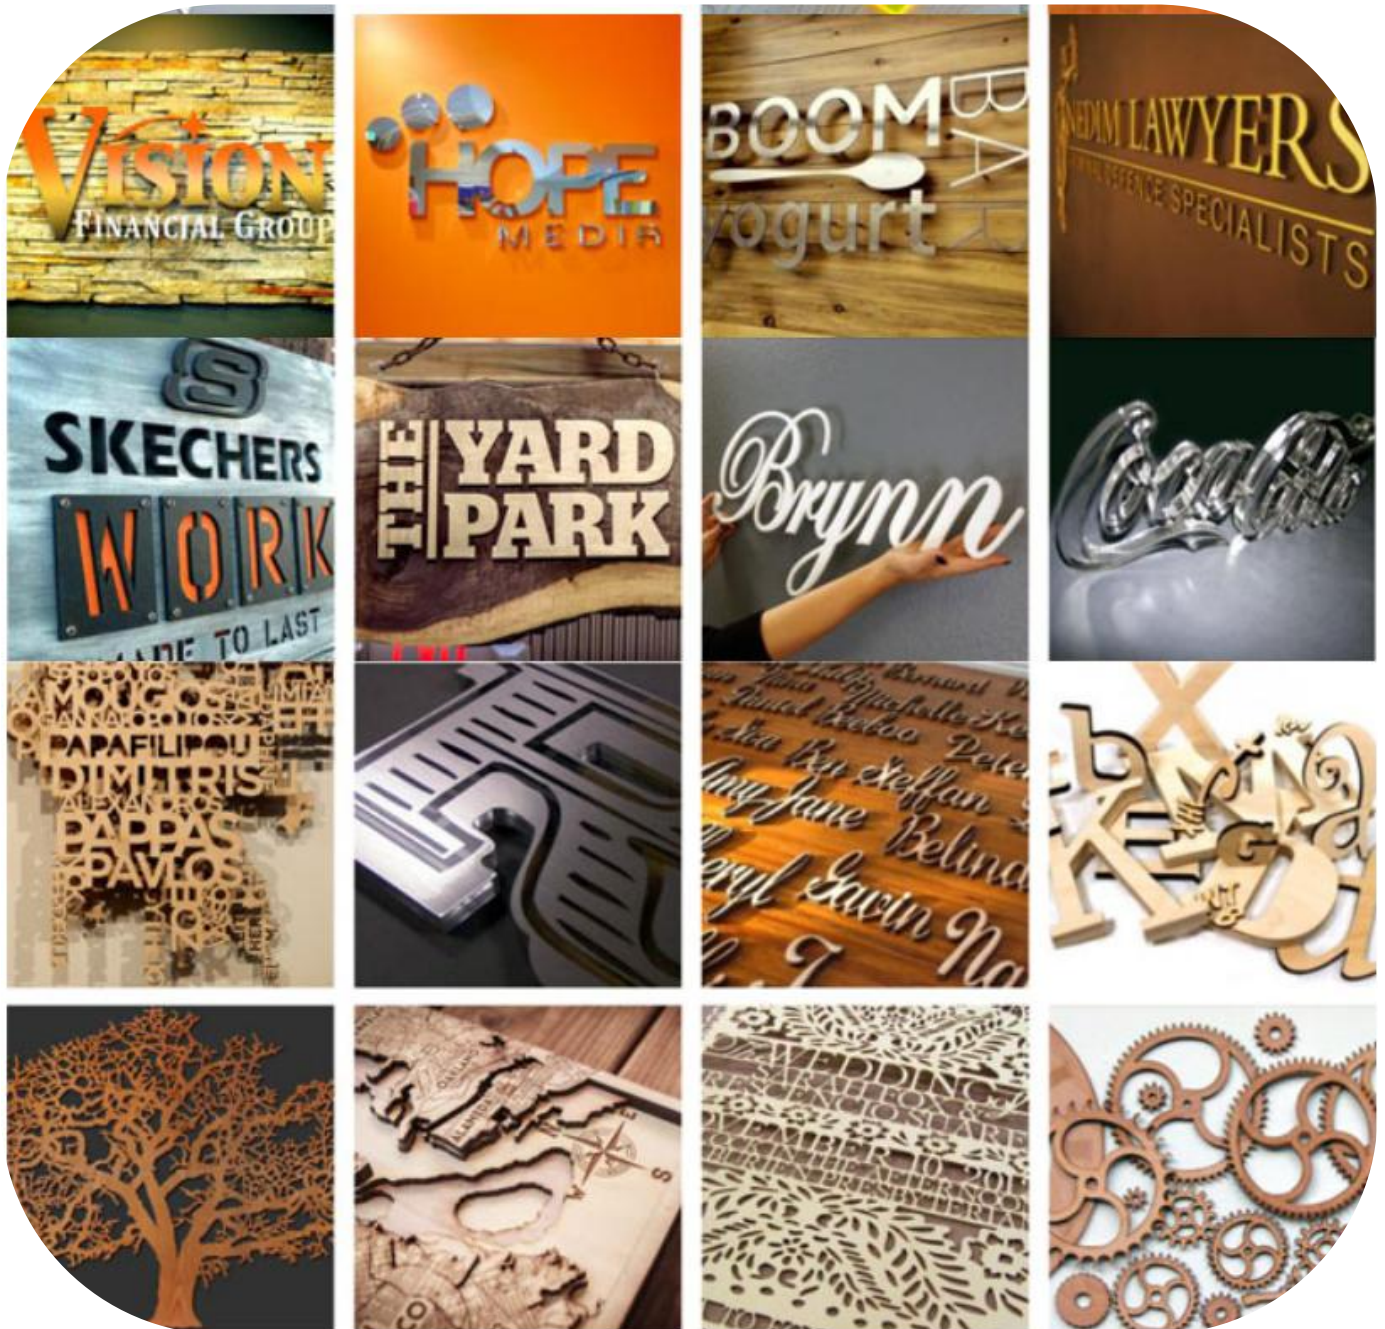

Easy to fix the machine on floor and easy to move the machine to the different place by wheel
